TOWN OF CLARKSVILLE

Community Invited to “Reconstruction of Woerner Avenue” Meeting

CLARKSVILLE, IN – Reconstruction of Woerner Avenue is one of the first elements of the South Clarksville Redevelopment Plan to be implemented. The public and area media organizations are invited to attend a community meeting on Thursday, January 18th at 6:30 p.m. to hear about the exciting infrastructure improvements planned for Woerner Avenue that will spark the physical transformation of the riverfront and adjacent lands.

The Town of Clarksville is partnering with a team of design consultants including local engineering firm JTL (Jacobi Toombs & Lanz) and the urban planning and design firm MKSK who originally developed the South Clarksville Redevelopment Plan. The team will present the current design, which reflects public input gathered through a series of community workshops held during the creation of the South Clarksville Redevelopment Plan and since its adoption. Major features of the future Woerner Avenue include floodwall modifications, underground utilities, low speed travel lanes, street parking, above-grade cycle track, sidewalks and community amenity zones all in a tree-lined urban setting boasting iconic Clarksville views.

The meeting will be held in Suite 201 of Water Tower Square Business Park, 590 Missouri Avenue, Jeffersonville, IN 47130. The meeting will begin promptly at 6:30 p.m.

WHAT: Community Meeting about Reconstruction of Woerner Avenue

WHEN: Thursday, January 18, 2018 – 6:30 p.m.

WHERE: Suite 201 of Water Tower Square Business Park – 590 Missouri Avenue, Suite 201, Jeffersonville, IN 47130.
